Section 1: The Core Weekdays (Monday – Friday)

Monday – Friday

4:00 PM Lift or HIIT Class Daily

Calories: **2,240** Protein: **232g** Carbs: **128g** Fats: **86g**

12:00 PM — FAST BREAKER

The Supercharged Parfait

1.5 cups Kroger Carbmaster yogurt + 2 scoops whey protein isolate + 1 cup frozen berries.

470 Calories | 83g Protein

Breaks your 16-hour fast with an enormous protein payload that is semi-liquid. It digests quickly, ensuring your stomach is completely empty and comfortable by your 4:00 PM workout.

3:00 PM — PRE-WORKOUT

The Liquid Primer

1 scoop whey protein isolate mixed with pure water.

110 Calories | 25g Protein

Floods your bloodstream with fast-acting amino acids to protect your muscle tissue during heavy lifting and high-intensity intervals without adding physical volume to your stomach.

4:00 PM – 6:00 PM

Gym Session

Lift or HIIT class.

6:15 PM — RECOVERY DINNER

The Heavy Refuel

20 oz (raw weight) 85/15 ground beef + 16 oz baked sweet potato (~1.5 potatoes).

1,600 Calories | 113g Protein

Your body is primed to handle the heavier fats from the 85/15 beef for sustained recovery. The massive sweet potato aggressively restores the glycogen depleted during your workout.

7:45 PM — WINDOW CLOSE

The Top-Off

1 cup Kroger Carbmaster milk.

60 Calories | 11g Protein

A zero-prep, liquid top-off to confidently secure your 230g protein goal right before your fasting window begins at 8:00 PM.

Section 2: The Rest Day (Saturday)

Saturday

No Gym | No Skating

Calories: **1,910** Protein: **228g** Carbs: **48g** Fats: **86g****12:00 PM**

Parfait

1.5 cups yogurt + 2 scoops whey + 1 cup berries.

3:00 PM

Skip This Completely

No pre-workout primer today.

6:15 PM

Dinner

20 oz 85/15 ground beef + 2 cups green beans.

7:45 PM

Window Close Top-Off

1 cup Carbmater milk + 1 scoop whey protein isolate.

Why Saturday is different

Because your physical output is vastly lower today, all heavy carbohydrates (sweet potatoes) are removed to accelerate fat burning. Protein remains fully maximized to repair the muscle damage from Monday through Friday.

Section 3: The Double-Day (Sunday)

Sunday

No Gym | 8:00 PM – 11:00 PM Roller Skating

Calories: **2,390** Protein: **237g** Carbs: **155g** Fats: **88g****12:00 PM****Parfait + Oats**

1.5 cups yogurt + 2 scoops whey + 1 cup berries + 1/2 cup dry oats mixed in.

3:00 PM**Skip This Completely**

No pre-workout primer needed during the day.

6:15 PM**Dinner**

20 oz 85/15 ground beef + 16 oz baked sweet potato.

7:45 PM — PRE-SKATE TOP-OFF**Window Close Top-Off**

1 cup Carbmaster milk + 1 scoop whey protein isolate.

Why Sunday is different

The added oats at noon provide complex, slow-burning carbs that stay in your system. Shifting the liquid whey to 7:45 PM guarantees your muscles are flooded with amino acids right as you step onto the rink for three hours.

Section 4: Your Weekly Fry's Grocery Order

ITEM	QUANTITY / NOTES
Meat & Dairy	
85/15 Ground Beef	9 lbs total. Provides 144 oz for the week; you need exactly 140 oz.
Kroger Carbmaster Yogurt	Three 32-oz tubs (Vanilla/Plain).
Kroger Carbmaster Milk	1 half-gallon carton (Non-fat/Low-fat).
Produce	
Sweet Potatoes	6.5 lbs (Approx. 9 medium-to-large potatoes).
Frozen Mixed Berries	Two 16-oz bags (or one 32-oz value bag).
Green Beans	1 standard bag (fresh or frozen, for Saturday).
Pantry & Supplements	
Whey Protein Isolate	1 standard tub. You will use exactly 21 scoops this week.
Rolled Oats	1 standard canister.

A Final Note on Energy Levels

You are averaging a daily burn rate of **3,500 to 4,000 calories** and eating roughly **2,240 calories**. This creates an enormous deficit, allowing for rapid weight loss. If you experience severe exhaustion or a sudden drop in lifting strength mid-week, you have the safety buffer to easily add **300–500 calories of pure carbohydrates** (like extra oats or rice) without slowing down your progress.
